

2014 Second Quarter Results

July 22, 2014

Forward-Looking Statements

This presentation and comments made by management contain forward-looking statements including, among others, statements regarding the expected future operating results of TSYS. These statements are based on management's current expectations and assumptions and are subject to risks, uncertainties and changes in circumstances. Forward-looking statements include all statements that are not historical facts and can be identified by the use of forward-looking terminology such as the words "believe," "expect," "anticipate," "intend," "plan," "potential", "estimate" or similar expressions. Actual results may differ materially from those set forth in the forward-looking statements due to a variety of factors. More information about these risks, uncertainties and factors may be found in TSYS' filings with the Securities and Exchange Commission, including its 2013 Annual Report on Form 10-K. TSYS does not assume any obligation to update any forward-looking statements as a result of new information, future developments or otherwise.

Use of Non-GAAP Financial Measures

This slide presentation contains certain non-GAAP financial measures determined by methods other than in accordance with generally accepted accounting principles. Such non-GAAP financial measures include the following: revenues before reimbursable items; operating margin excluding reimbursable items; revenues measured on a constant currency basis; free cash flow; EBITDA, adjusted EBITDA, adjusted earnings per share, adjusted segment operating income and adjusted segment operating margin. The most comparable GAAP measures to these measures are revenues; operating margin; revenues; cash flows from operating activities; net income; net income; earnings per share, operating income and operating margin, respectively. Management uses these non-GAAP financial measures to assess the performance of TSYS' core business. TSYS believes that these non-GAAP financial measures provide meaningful additional information about TSYS to assist investors in evaluating TSYS' operating results. These non-GAAP financial measures should not be considered as a substitute for operating results determined in accordance with GAAP and may not be comparable to other similarly titled measures of other companies. The computations of the non-GAAP financial measures used in this slide presentation are set forth in the Appendix to this slide presentation.

Q&A

Appendix

Appendix: Non-GAAP Items – Adjusted EBITDA and Adjusted EPS

- Adjusted EBITDA is net income excluding equity in income of equity investments, nonoperating income/(expense), taxes, depreciation, amortization and stock-based compensation expenses and NetSpend merger & acquisition expenses.
- Adjusted EPS is adjusted earnings divided by weighted average shares outstanding used for basic EPS calculations. Adjusted earnings is net income excluding the after-tax impact of stock-based compensation expenses, amortization of acquisition intangibles, and NetSpend merger & acquisition expenses.
- Adjusted segment operating income is operating income at the segment level adjusted for acquisition intangible amortization.
- Adjusted segment operating margin is adjusted segment operating income divided by segment revenues before reimbursable items.
- The Company believes that these non-GAAP financial measures it presents are useful to investors in evaluating the Company's operating performance for the following reasons:
 - adjusted EBITDA and adjusted EPS are widely used by investors to measure a company's operating performance without regard to items, such as interest expense, income tax expense, depreciation and amortization, merger and acquisition expenses and employee stock-based compensation expense that can vary substantially from company to company depending upon their respective financing structures and accounting policies, the book values of their assets, their capital structures and the methods by which their assets were acquired; and
 - securities analysts use adjusted EBITDA and adjusted EPS as supplemental measures to evaluate the overall operating performance of companies.
- By comparing the Company's adjusted EBITDA and adjusted EPS in different historical periods, investors can evaluate the Company's operating results without the additional variations caused by employee stock-based compensation expense, which may not be comparable from period to period due to changes in the fair market value of the Company's common stock (which is influenced by external factors like the volatility of public markets and the financial performance of the Company's peers) and is not a key measure of the Company's operations.
- The Company's management uses the non-GAAP financial measures:
 - as measures of operating performance, because they exclude the impact of items not directly resulting from the Company's core operations;
 - for planning purposes, including the preparation of the Company's annual operating budget;
 - to allocate resources to enhance the financial performance of the Company's business;
 - to evaluate the effectiveness of the Company's business strategies; and
 - in communications with the Company's board of directors concerning the Company's financial performance.
